    A.   Python
    B.   JavaScript
V.   Database
    A.   Flat File
    B.   Relational

6.Create the following using Division tag And Style it Using **Internal CSS**.

What a Software Developer , Software Engineer and a Web Designer Do ?

Software Developers

Software developers create the computer applications that allow users to do specific tasks and the underlying systems that run the devices or control networks. Software quality assurance analysts and testers design and execute software tests to identify problems and learn how the software works.

Software Developers

Computer science is the most common degree that software developers choose when starting their career. When you get a degree in computer science, you will primarily study the exact skills that you will use on a daily basis as a developer.

Software Engineer

A software engineer is a person who applies the principles of software engineering to design, develop, maintain, test, and evaluate computer software. The term programmer is sometimes used as a synonym, but may also lack connotations of engineering education or skills.

Software Engineer

Software engineering is the branch of computer science that deals with the design, development, testing, and maintenance of software applications. Software engineers apply engineering principles and knowledge of programming languages to build software solutions for end users.

Web Design

Web design encompasses many different skills and disciplines in the production and maintenance of websites. The different areas of web design include web graphic design; user interface design; authoring, including standardised code and

Web Design

Web designers plan, create and code internet sites and web pages, many of which combine text with sounds, pictures, graphics and video clips. A web designer is responsible for creating the design and layout of a website or web pages. It and can mean working on a brand new website or updating an already existing site.

7. Create tables Using Rowspan and ColSpan:

Hello Code Better

MEAN STACK - MERN stack is a collection of technologies that enables faster application development. It is used by developers worldwide. The main purpose of using MERN stack is to develop apps using JavaScript only. This is because the four technologies that make up the technology stack are all JS-based.

FULL STACK DEVELOPMENT - A full-stack developer is a developer or engineer who can build both the front end and the back end of a website. The front end (the parts of a website a user sees and interacts with) and the back end (the behind-the-scenes data storage and processing) require different skill sets.

The MEAN stack is a JavaScript-based framework for developing web applications. MEAN is named after MongoDB, Express, Angular, and Node, the four key technologies that make up the layers of the stack.

- A full-stack developer is
- A full-stack developer is

Republic day | Details History Republic

Republic day ✕

Republic Day commemorates the adoption of the Constitution of India on January 26, 1950. While India gained independence from the British Raj in 1947, it wasn't until January 26, 1950, that the Constitution of India came into effect, and the country became a sovereign state, declaring it a republic. The Constituent Assembly held its first session on December 9, 1946, and the last on November 26, 1949, and then the Constitution was adopted a year later. Dr BR Ambedkar headed the Drafting Committee of the Constitution. On this day, India also marks Constitution Day.

Republic Day commemorates the spirit of independent India. On this day, in 1930, the Indian National Congress proclaimed Purna Swaraj from colonial rule. Republic Day also commemorates Indian citizens' power to choose their
